

Management for Local Health Departments

NebulaNow delivers an unparalleled solution to help Local Health Departments easily and efficiently manage their critical business functions. Capture and organize critical health data on any device. Accelerate your response time. Manage the permitting, licensing and inspection processes. Seamlessly share data with key trading partners like State Agencies, local schools and clinics.

Management

Management for outbreaks, contact tracing, defined practices for diseases like COVID-19, tuberculosis & HIV, and for permitting, licensing and inspection.

Rapidly deploy on any device

Real-time deployment with a mobile, user-friendly app, for health directors, field investigators, healthcare workers, volunteers, schools, and the public.

Reporting and dashboards

Actionable workflows based on data, and reports, all integrated to share with virtually any system.

Reliable, secure and compliant

Business continuity and disaster recovery, attestation of penetration tests and security assessments performed by third parties.
